ONDC BUYER APP PUBLIC DISCLOSURE

Sorting parameters and relative importance

The factors used to rank eligible ONDC search responses after minimum-standard checks.

Organisation	Zero Margin Food Systems Foundation
Role	Buyer NP - Retail (B2C)
Domain	ONDC:RET10 - Grocery
Version	0.1
Effective date	31 August 2026
Disclosure	Buyer App Disclosure 2

1. Default sorting logic

Eligible results are ranked using the weighted factors below. Search relevance is the primary factor. Where a value is missing or cannot be compared reliably, it receives no preferential weight.

Parameter	Weight	How it affects ranking
Search relevance	40%	Match of item name, category and description to the buyer's query.
Total buyer price	25%	Lower total payable value, including disclosed delivery and other charges, ranks higher.
Estimated delivery time	15%	Shorter valid delivery estimates rank higher.
Distance	10%	Sellers closer to the buyer's delivery location rank higher.
Seller or product rating	10%	Higher network-provided ratings rank higher when comparable data exists.

2. Buyer-controlled alternatives

The buyer-facing interface will provide reasonable alternatives to sort eligible results by total price, delivery time, distance, or rating. These choices operate only after the legal, protocol and minimum-standard filters.

3. Commercial influence

Zero Margin Food Systems Foundation currently charges a 0% buyer-app finder fee and does not accept payment for search placement. Promoted results, if introduced later, will be clearly labelled and this disclosure will be updated before use.

4. Contact

Questions may be raised at https://ondc.zeroprofit.food/support or by calling/WhatsApp +91 99692 95759 during published support hours.
